TEXAS

To whom this may concern,

My name is Paul Thomas, ever since I was young, I have had a passion for computer science. I have always loved learning about how computers work, and it has shaped me into who I am today. Programming is in my blood; both of my parents are involved in the tech industry. Neither of my parents went to college, but that did not set them back from reaching their goals and dreams. My parents taught me the true value of hard work and perseverance. I love working on projects with others, and my peers have praised me for my problem-solving skills. I love giving great criticism and receiving great feedback, I understand that teamwork is everything. My outgoing personality provides for an excellent partnership environment. I feel as though my own values mirror those of your company's mission statement. I would make an excellent addition to your team because I am eager to learn and I am an efficient worker. I have been learning C++ in college and no challenge has brought me down. I have strong knowledge in all Microsoft tools and applications and some use in Linux systems. I feel that I can bring excitement, passion, and hard work to the table. I always do my best to encourage the people around me to promote an exciting and productive work environment. I feel as being part of the UMHB Research team and officer for Crunix I have a competitive edge and practical experience. I am always eager and ready to learn.

After reviewing my resume, I hope you will agree that I am the type of competitive and hard-working candidate you are searching for. Thank you for your consideration. I look forward to hearing from you.

Sincerely, Paul Thomas
